IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re application of: David Wallman

Attorney Docket No.: SUN1P270/P4566

Application No.: 09/591,172

Examiner: SHAH, Niles R.

Filed: June 9, 2000

Group: 2127

Title: METHOD AND APPARATUS FOR
IMPLEMENTING AN EXTENDED VIRTUAL
MACHINE

Confirmation No.: 3517

CERTIFICATE OF MAILING

I hereby certify that this correspondence is being deposited with the U.S. Postal Service with sufficient postage as first-class mail on NOV. 24, 2003, in an envelope addressed to the Commissioner for Patents, P.O. Box 1450 Alexandria, VA 22313-1450.

Signed: _____

Sally Zumba

REQUEST FOR CORRECTED FILING RECEIPT

DEC 08 REC'D

Sir:

TC 2100

Enclosed is a copy of the Filing Receipt for the above-identified patent application. The requested changes are marked in red ink. Please reprint the Filing Receipt as follows and mail the corrected copy to the undersigned.

Change the attorney Docket No. SUN1P2/P4566 to -- **SUN1P270/P4566** --.

Enclosed is a copy of the Utility Patent Application Transmittal and also a copy of the first page of the specification, indicating the correct attorney docket number.

Since this is a Patent Office typographical error, no fee should be due. However, the Commissioner is authorized to charge any fees that may be due to Deposit Account 500388 (Order No. SUN1P270).

Respectfully submitted,

BEYER WEAVER & THOMAS, LLP

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. **If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the PTO processes the reply to the Notice, the PTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).**

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

COPY

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 36 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

PLEASE NOTE the following information about the Filing Receipt:

- The articles such as "a," "an" and "the" are not included as the first words in the title of an application. They are considered to be unnecessary to the understanding of the title.
- The words "new," "improved," "improvements in" or "relating to" are not included as first words in the title of an application because a patent application, by nature, is a new idea or improvement.
- The title may be truncated if it consists of more than 600 characters (letters and spaces combined).
- The docket number allows a maximum of 25 characters.
- If your application was submitted under 37 CFR 1.10, your filing date should be the "date in" found on the Express Mail label. If there is a discrepancy, you should submit a request for a corrected Filing Receipt along with a copy of the Express Mail label showing the "date in."

Any corrections that may need to be done to your Filing Receipt should be directed to:

Method and Apparatus for Implementing an Extended Virtual Machine

Invented By:
David Wallman

COPY

BACKGROUND OF THE INVENTION

1. Field of Invention

The present invention relates generally to computing systems. More particularly, the present invention relates to a virtual machine on which an application may run at substantially any given time.

RECEIVED

DEC 05 2003

Technology Center 2100

2. Description of the Related Art

As the use of object-based computing systems increases, the use of virtual machines which run with respect to computing systems is becoming more prevalent. A virtual machine may generally be considered to be self-contained operating environment that functions as if it were a separate computing system. By way of example, a virtual machine may be software which acts as an interface between a computer program, *e.g.*, compiled binary code, and a processor which is arranged to execute instructions specified by the computer program.

In general, a virtual machine includes an engine which enables an application or, more specifically, program codes, to be executed by computer hardware. Standard virtual machines engines include components such as an interpreter and a class loader, as will be understood by those skilled in the art. An interpreter perform operations defined byte codes as each byte code is read into the interpreter. A class loader loads classes needed to complete a particular job using the virtual machine.

Virtual machines only support the execution of one application per virtual machine process. In other words, when more than one application is to be executed substantially concurrently, then more than one virtual machine must be started such that each application has its own instance of a virtual machine, *i.e.*, only one application may be executed per virtual machine process. A job is started on a virtual machine for each application. The initialization of a virtual machine generally causes significant performance penalty. In particular, the loading of all classes related to a
